## **SECTION I – EXECUTIVE SUMMARY**

The purpose of this report is to provide accounting and financial disclosure information under the Governmental Accounting Standards Board (GASB) Statement Nos. 74 and 75 for the Other Postemployment Benefits Plan provided by the Tri-County Metropolitan Transportation District of Oregon. This information includes:

- Determination of the discount rate as of January 1, 2024, and December 31, 2024;
- Sensitivity of the Net OPEB Liability to changes in discount rates and health care cost trend rates;
- Note disclosures and required supplementary information under GASB 74 for the Plan; and,
- Note disclosures and required supplementary information under GASB 75 for the employer.

## Highlights

The Other Postemployment Benefit Plan (OPEB Plan) provided by the Tri-County Metropolitan Transportation District of Oregon (TriMet) is currently funded on a pay-as-you-go basis, but there is an OPEB trust with a small amount of assets. As a result, this report contains disclosures required by GASB 74 as well as GASB 75. The measurement date is December 31, 2024, which is used for the Plan's GASB 74 reporting and for TriMet's GASB 75 reporting as of June 30, 2025. Measurements are based on the Total OPEB Liability and the fair value of assets as of December 31, 2024.

## **SECTION I – EXECUTIVE SUMMARY**

Table I-1 below summarizes the December 31, 2024 and January 1, 2024 actuarial valuation results.

| Table I - 1<br>Summary of Key Valuation Results |    |             |    |             |  |  |  |  |  |  |  |  |

| Total OPEB Liability                            |    |             |    |             |  |  |  |  |  |  |  |  |
| <u>Union</u>                                    |    |             |    |             |  |  |  |  |  |  |  |  |
| Active  | \$ | 227,880,415 | \$ | 265,912,616 |  |  |  |  |  |  |  |  |
| Inactive  |    | 353,729,276 |    | 378,730,463 |  |  |  |  |  |  |  |  |
| Total Union                                     | \$ | 581,609,691 | \$ | 644,643,079 |  |  |  |  |  |  |  |  |
| Non-Union                                       |    |             |    |             |  |  |  |  |  |  |  |  |
| Active  | \$ | 32,511,401  | \$ | 33,099,994  |  |  |  |  |  |  |  |  |
| Inactive  |    | 31,721,251  |    | 33,603,379  |  |  |  |  |  |  |  |  |
| Total Non-Union                                 | \$ | 64,232,652  | \$ | 66,703,373  |  |  |  |  |  |  |  |  |
| Total   | \$ | 645,842,343 | \$ | 711,346,452 |  |  |  |  |  |  |  |  |
| Market Value of Assets                          |    | 455,155     |    | 435,896     |  |  |  |  |  |  |  |  |
| Net OPEB Liability                              | \$ | 645,387,188 | \$ | 710,910,556 |  |  |  |  |  |  |  |  |

The Total OPEB Liability decreased from \$711.3 million to \$645.8 million. The expected liability for this year, reflecting an additional year of service and interest offset by the benefits paid, was \$728.4 million. The actual liability is \$82.6 million less than the expected liability, primarily due to the increase in the discount rate, which decreased the liability by \$67.0 million. In addition, the premium experience decreased the liability by \$17.6 million, demographic experience further reduced the liability by \$6.2 million, and the change in measurement date to 12/31 decreased the liability by \$1.5 million. Offsetting these reductions, changes in medical trend assumptions increased the liability by \$9.7 million.

## **SECTION I – EXECUTIVE SUMMARY**

Table I-2 below summarizes the actuarial valuation results for union members split between Streetcar and Non-Streetcar employees.

| Table I-2Summary of Union Valuation ResultsDecember 31, 2024 |    |            |    |               |    |             |  |  |  |  |  |

### **SECTION I – EXECUTIVE SUMMARY**

On the June 30, 2025 reporting date, TriMet will report a Net OPEB Liability (NOL) of 645,387,188, deferred outflows of resources of 103,267,272, and deferred inflows of resources of 291,198,786 related to the Plan. Consequently, the net impact on TriMet's statement of net position due to the Plan would be 833,318,702 [833,318,702 = 645,387,188 - 103,267,272 + 291,198,786]. In addition, any contributions between the measurement date and the reporting date are to be reported as deferred outflows of resources to offset the cash outflows reported. We estimate explicit subsidy payments of 12.5 million and implicit subsidy payments of 1.7 million between December 31, 2024 and June 30, 2025. The estimated explicit subsidy payments are known in italics in Table I-3 should be replaced with actual amounts when those amounts are known after the fiscal year-end.

The NOL decreased approximately \$65.5 million during the measurement period. The change in NOL due to actuarial gains and losses as well as assumption changes is recognized over the average remaining service life, determined at the beginning of each measurement period, which is seven years as of the current measurement period and six years as of the prior measurement period for the Plan. The change in NOL due to investment gains and losses is recognized in OPEB expense over five years, beginning in the year of occurrence. Unrecognized amounts are reported as deferred outflows of resources and deferred inflows of resources.

For the reporting year ending June 30, 2025, the annual OPEB expense is (\$4,138,789) or (1.25%) of covered-employee payroll. This amount reflects TriMet's contributions to the Plan during the measurement period, \$24,397,698, plus the change in the net impact on TriMet's statement of net position [(\$4,138,789) = \$24,397,698 + \$833,318,702 - \$861,855,189]. Volatility in OPEB expense from year to year is to be expected. A breakdown of the components of the net OPEB expense is shown in Section V of this report.

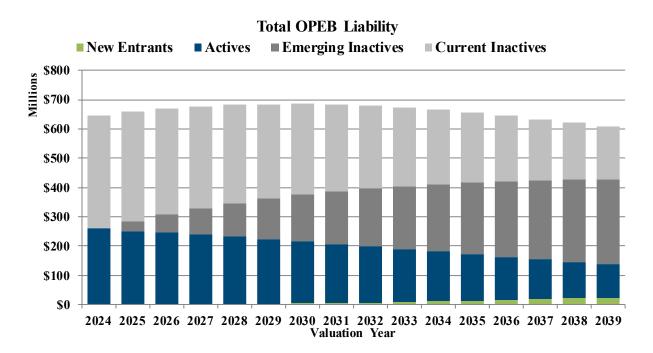

## **SECTION I – EXECUTIVE SUMMARY**

The chart below shows the projection of the Total OPEB Liability (TOL) for the combination of union and non-union members assuming the discount rate remains constant, and all other assumptions are met. Each year, the TOL increases with interest and the accrual of additional benefits and decreases for the benefits that are paid.

The small green bars on the bottom represent the projected liability for new hires after the valuation date. Because new hires earn benefits under Tier 3, the liability for these members is much lower than for Tiers 1 and 2. The dark blue bars represent the liability for current active members while they remain active employees, and the dark gray bars represent the liability for participants current active members as they retire. The light gray bars represent the liability for participants currently receiving benefits.

The Total OPEB Liability is projected to grow until 2030 when it is expected to start declining, as Tier 3 becomes more dominant.

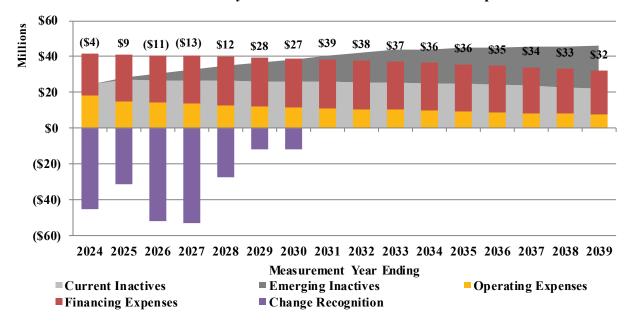

The chart on the following page shows a projection of benefit payments and OPEB expense for the next 15 years assuming the discount rate remains constant, all assumptions are met, and contributions are equal to the benefit payments each year.

The light gray area in the background represents projected benefit payments for participants currently receiving benefits. The dark gray area in the background represents projected benefit payments for participants who are currently active employees. Benefit payments (also TriMet contributions) are expected to grow significantly as current employees retire, increasing from \$24.4 million in calendar year 2024 to over \$45 million by the end of the projection period.

## **SECTION I – EXECUTIVE SUMMARY**

Benefit Payments/Contributions and OPEB Expense

The annual OPEB expense under GASB 75 is shown by its key components, assuming no discount rate changes and all assumptions are met. The gold bars represent the operating expenses of the OPEB Plan. These expenses are primarily due to the benefits for active employees that are attributed to future years of service. As Tier 2 employees retire and are replaced with Tier 3 employees, the operating expenses of the OPEB plan are expected to decline from approximately \$18.4 million to approximately \$7.6 million over the projection period.

The red bars represent the financing expenses of the OPEB Plan, which are largely interest on the TOL. If the OPEB Plan were prefunded, the expected return on assets would offset the interest costs. Assuming the discount rate remains at 4.08% and all other assumptions are met, the financing expense is expected to increase gradually from \$23.1 million this year to \$27.4 million in 2030 before declining slowly to \$24.5 million at the end of the projection.

Assumption changes and experience gains and losses are also recognized over time as a component of OPEB expense. These amounts, represented by the purple bars, represent an offset to expense for seven years due primarily to the experience gains from 2021 through 2023, as well as increases in the discount rate this year and two years ago. As experience emerges, these changes are likely to be the most volatile component of OPEB expense.

The numbers at the top of the stacked bars represent the annual OPEB expense projected for each year. OPEB expense is actually income for the current year and is projected to be income for two of the next three years as historical gains are recognized. The OPEB expense is expected to jump from an income of \$13 million in 2027 to an expense of \$28 million in 2029 and then to an expense of \$39 million as gains are fully recognized and then gradually decline to \$32 million in 2039.

## **SECTION II – CERTIFICATION**

The purpose of this report is to provide accounting and financial disclosure information under Governmental Accounting Standards Board (GASB) Statement Nos. 74 and 75 for the Other Postemployment Benefits (OPEB) Plan provided by the Tri-County Metropolitan Transportation District of Oregon (TriMet). This report is for the use of TriMet and its auditors in preparing financial reports in accordance with applicable law and accounting requirements. This report is not appropriate for other purposes, including the measurement of funding requirements for the Plan.

In preparing our report, we relied on information (some oral and some written) supplied by TriMet. This information includes, but is not limited to, the plan provisions, employee data, and financial information. We performed an informal examination of the obvious characteristics of the data for reasonableness and consistency in accordance with Actuarial Standard of Practice No. 23.

Cheiron utilizes ProVal, an actuarial valuation software leased from Winklevoss Technologies (WinTech) to calculate the liabilities, normal costs, and projected benefit payments. Projections of the Total OPEB Liability in this report were also developed using ProVal. We have relied on WinTech as the developer of ProVal. We have reviewed ProVal and have a basic understanding of it and have used ProVal in accordance with its original intended purpose. We have not identified any material inconsistencies in assumptions or output of ProVal that would affect this actuarial valuation.

Future actuarial measurements may differ significantly from the current measurements due to such factors as the following: plan experience differing from that anticipated by the economic or demographic assumptions; changes in economic or demographic assumptions; and, changes in plan provisions or applicable law.

The claim costs and trend assumptions reflect the Inflation Reduction Act of 2022 (the Act) including associated regulations and market responses to date. As the regulations and market responses evolve, the impact on future costs could vary significantly from those assumed in this valuation.

This report and its contents have been prepared in accordance with generally recognized and accepted actuarial principles and practices and our understanding of the Code of Professional Conduct and applicable Actuarial Standards of Practice set out by the Actuarial Standards Board as well as applicable laws and regulations. Furthermore, as credentialed actuaries, we collectively meet the Qualification Standards of the American Academy of Actuaries to render the opinion contained in this report. This report does not address any contractual or legal issues. We are not attorneys, and our firm does not provide any legal services or advice.

#### **SECTION II – CERTIFICATION**

This report was prepared for TriMet for the purposes described herein and for the use by the auditors in completing an audit related to the matters herein. Other users of this report are not intended users as defined in the Actuarial Standards of Practice, and Cheiron assumes no duty or liability to any such other user.

### SECTION III – DETERMINATION OF DISCOUNT RATE

The discount rate used to measure the Total OPEB Liability as of January 1, 2024 was 3.26%. The discount rate used to measure the Total OPEB Liability as of December 31, 2024 was 4.08%.

In developing the projection of cash flows used to determine the discount rate, we assumed that employer contributions to the Plan will continue to follow the pay-as-you-go contribution policy. Based on this assumption, the discount rate used at the January 1, 2024 and December 31, 2024 measurement dates is equal to the yield on the Bond Buyer 20-Bond GO Index as of December 28, 2023 and December 26, 2024, respectively.

## SECTION III – DETERMINATION OF DISCOUNT RATE

| Balances at 12/31/2024                       | \$ 581,609,691      | \$ 64,232,652                              | \$ 645,842,343 | \$ 455,155   | \$ 645,387,188 |  |  |  |  |  |  |  |  |  |

During the measurement year, the NOL decreased by approximately \$65.5 million. The service cost and interest cost increased the NOL by approximately \$41.5 million while contributions and net investment earnings decreased the NOL by approximately \$24.4 million.

There were no changes in benefits during the year. There were changes in assumptions during the measurement year, which decreased the TOL by approximately \$58.8 million. There was a liability gain during the year due to experience (population and health claims experience), which decreased the TOL by approximately \$23.8 million.

## SECTION IV – GASB 74 REPORTING INFORMATION

Changes in the discount rate affect the measurement of the TOL. Lower discount rates produce a higher TOL and higher discount rates produce a lower TOL. The table below shows the sensitivity of the NOL to the discount rate.

| Table IV - 2<br>Sensitivity of NOL to Changes in Discount Rate<br>December 31, 2024 |          |                                       |          |                                       |          |                                       |  |  |  |  |  |
|---|----------|---------------------------------------|----------|---------------------------------------|----------|---------------------------------------|--|--|--|--|--|
|   |          | 1%<br>Decrease<br>3.08%               |          | Discount<br>Rate<br>4.08%             |          | 1%<br>Increase<br>5.08%               |  |  |  |  |  |
| Total OPEB Liability<br>Plan Fiduciary Net Position<br>Net OPEB Liability           | \$<br>\$ | 729,002,300<br>455,155<br>728,547,145 | \$<br>\$ | 645,842,343<br>455,155<br>645,387,188 | \$<br>\$ | 576,561,577<br>455,155<br>576,106,422 |  |  |  |  |  |
| Plan Fiduciary Net Position as a<br>Percentage of the Total OPEB Liability          |          | 0.1%                                  |          | 0.1%                                  |          | 0.1%                                  |  |  |  |  |  |

A one percent decrease in the discount rate increases the TOL by approximately 13% and increases the NOL by approximately 13%. A one percent increase in the discount rate decreases the TOL by approximately 11% and decreases the NOL by approximately 11%.

Changes in healthcare trends also affect the measurement of the TOL. Lower healthcare trends produce a lower TOL and higher healthcare trends produce a higher TOL. The table below shows the sensitivity of the NOL to healthcare trends.

| Table IV - 3<br>Sensitivity of NOL to Changes in Healthcare Cost Trend Rates<br>December 31, 2024 |           |                        |           |                        |    |                        |  |  |  |  |  |
|---|-----------|------------------------|-----------|------------------------|----|------------------------|--|--|--|--|--|
|   |           | 1%<br>Decrease         |           | Healthcare<br>Trend    |    | 1%<br>Increase         |  |  |  |  |  |
| Total OPEB Liability<br>Plan Fiduciary Net Position   | \$        | 573,008,077<br>455,155 | \$        | 645,842,343<br>455,155 | \$ | 734,218,654<br>455,155 |  |  |  |  |  |
| Net OPEB Liability<br>Plan Fiduciary Net Position as a  | <u>\$</u> | 572,552,922            | <u>\$</u> | 645,387,188            | \$ | 733,763,499            |  |  |  |  |  |
| Percentage of the Total OPEB Liability  |           | 0.1%                   |           | 0.1%                   |    | 0.1%                   |  |  |  |  |  |

A one percent decrease in the healthcare trends decreases the TOL by approximately 11% and decreases the NOL by approximately 11%. A one percent increase in the healthcare trends increases the TOL by approximately 14% and increases the NOL by approximately 14%.

### **SECTION IV – GASB 74 REPORTING INFORMATION**

## **Required Supplementary Information**

The schedules of Required Supplementary Information start with information as of the implementation of GASB 74 and eventually will build up to 10 years of information. The schedules below show the changes in NOL and related ratios required by GASB.

| Table IV - 4Schedule of Changes in Net OPEB Liability and Related Ratios |    |              |             |              |    |               |             |               |  |  |

### SECTION V - GASB 75 REPORTING INFORMATION

The schedules in this section provide the information TriMet needs to report under GASB 75. The impact of experience gains or losses and assumption changes on the TOL are recognized in expense over the average expected remaining service life of all active and inactive members of the Plan. As of the beginning of the measurement year, this recognition period is seven years.

The table below summarizes the current balances of deferred outflows and deferred inflows of resources related to the Plan along with the net recognition over the next five years and the total recognition thereafter if any. Amounts are split between the union and non-union groups, but only the total applies to TriMet's financial statements. For this purpose, the assets in the Trust were allocated to the union and non-union groups in proportion to the TOL at the beginning and end of the year, and the actual earnings for each group also include the impact of any change in proportion during the year.

| Schedule of Defer   | .re | d Inflows  |               | le V - 1<br>ows of Resou | irces as of I  | December 3    | 1, 2024        |
|---|-----|------------|---------------|--------------------------|----------------|---------------|----------------|
|   |     | Deferred   | Outflows of   |                          | Deferred       | Inflows of F  |                |
|   |     | Union      | Non-Union     | Total                    | Union          | Non-Union     | Total          |
| Differences between expected and actual experience                                  | \$  | 0          | \$ 121,564    | \$ 0                     | \$ 141,396,825 | \$ 21,277,233 | \$ 162,552,494 |

### SECTION V – GASB 75 REPORTING INFORMATION

## **Annual OPEB Expense**

The annual OPEB expense can be calculated in two different ways. First, it is the change in the amounts reported on TriMet's Statement of Net Position that relate to the Plan and are not attributable to employer contributions. That is, it is the change in the NOL minus the change in deferred outflows plus the change in deferred inflows plus employer contributions during the year.

Alternatively, annual OPEB expense can be calculated by its individual components. While GASB does not require or suggest the organization of the individual components shown in the table on the next page, we believe it helps to understand the level and volatility of the OPEB expense.

In the calculation of OPEB expense by individual components, there are three separate sections: operating expenses, financing expenses, and changes. Operating expenses are items directly attributable to the operation of the Plan during the measurement year. Service cost less employee contributions represents the increase in employer-provided benefits attributable to the measurement year, and administrative expenses are the cost of operating the Plan for the year.

Financing expenses equal the interest on the TOL less the expected return on assets.

The final category is changes. This category drives most of the volatility in OPEB expenses from year to year. It includes any changes in benefits made during the year and the recognized amounts due to assumption changes, gains or losses on the TOL, and investment gains or losses.

### SECTION V - GASB 75 REPORTING INFORMATION

The table shows the development of OPEB expense using both methodologies. In addition to the information shown below, any contributions between the measurement date and the reporting date would be reported as deferred outflows of resources to offset the cash outflows reported.

### SECTION V - GASB 75 REPORTING INFORMATION

The table below shows the projection of OPEB expense for the 2025 measurement year assuming that all assumptions are exactly met and that the discount rate, which is based on a municipal bond index, remains at 4.08%. This expense amount would be different if TriMet starts contributing to the Trust fund.

## **APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS**

The discount rate and per person health care cost trend assumptions were updated as described below. The price inflation, wage inflation, and demographic assumptions are the same as those used in the pension valuations. Please refer to the pension valuation reports for the rationale for these assumptions. Other OPEB-specific assumptions were selected based on recent experience and expectations for the future. We believe the assumptions to be reasonable.

## **Economic Assumptions**

| 1. | Expected Return on Assets | 0.00% per year. There is a very small amount of assets in<br>an OPEB trust that if used to pay benefits would not last a<br>month. The assets are invested in short-term fixed-income<br>securities. For simplicity, we have assumed no investment<br>earnings on these assets. |
|----|---------------------------|---|
| 2. | Municipal Bond Yield      | 3.26% as of January 1, 2024<br>4.08% as of December 31, 2024<br>Bond Buyer 20-Bond GO Index, December 28, 2023, and<br>December 26, 2024  |
| 3. | Discount Rate:            | 3.26% as of January 1, 2024<br>4.08% as of December 31, 2024  |
| 4. | Wage Inflation:           | 3.00% per year for Management and 3.25% for ATU for<br>purposes of attributing individual costs under the Entry Age<br>Actuarial Cost Method.   |
| 5. | Price Inflation:          | 2.75% per year.   |
| 6. | Dental Trends:            | Dental premiums and costs are assumed to increase at 3.0% per year in all years.  |
| 7. | Stipend Trends:           | The monthly stipend is assumed to increase at 2.75% per year (the same as inflation). The Tier 3 stipend does not increase until 2025.  |

## **APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS**

### 8. Per Person Health Care Cost Trends:

Medical Trend assumptions were developed using the Society of Actuaries (SOA) Long-Run Medical Cost Trend Model version 2025-1b. The following assumptions were input into this model:

| Trend Assumption Inputs                            |        |  |  |  |
|--|--------|--|--|--|
| Variable   | Rate   |  |  |  |
| Rate of Inflation                                  | 2.75%  |  |  |  |
| Rate of Growth in Real Income/GDP per capita 2034+ | 1.25%  |  |  |  |
| Extra Trend due to Taste/Technology 2034+          | 0.90%  |  |  |  |
| Expected Health Share of GDP 2034                  | 19.80% |  |  |  |
| Health Share of GDP Resistance Point               | 18.00% |  |  |  |
| Year for Limiting Cost Growth to GDP Growth        | 2045   |  |  |  |

The SOA Long-Run Medical Cost Trend Model and its baseline projection are based on an econometric analysis of historical U.S. medical expenditures and the judgments of experts in the field. The long-run baseline projection and input variables have been developed under the guidance of the SOA Project Oversight Group.

We have relied on the Society of Actuaries as the developer of the Model. We have reviewed the Model, have a basic understanding of the Model, and have used the Model in accordance with its original intended purpose. We have reviewed the baseline assumptions for the model and found them to be reasonable and consistent with the other economic assumptions used in the valuation, with the exceptions discussed below.

The trends selected from 2025 to 2028 were based on plan design, population weighting, renewal projections from the current health care actuary, and market analysis. The trend assumptions for this period also reflect the Inflation Reduction Act of 2022 (the Act), including associated regulations and market responses to date. As the regulations and market responses evolve, the impact on future costs could vary significantly from those assumed in this valuation.

The expected health share of GDP in 2034 is set to 19.8% of GDP. This assumption is consistent with the trends through 2034 and also with the 2024 Medicare Trustees report projection for 2032.

Medicare Part B Trends are developed from the published 2024 Medicare Trustees Report as the 2025 report was not available when the assumptions were developed. The trend rates from 2025 through 2034 are the short-term trends stated in the report. The Trustee report then grades the trend down to an assumption of GDP plus 0.2% by 2048 and GDP minus 0.1% by 2098. The Trustee report is based on a long-term GDP assumption of 3.7%, which is lower than our assumption of 4.03%. We have used our 4.03% assumption in place of the Trustee report assumption so that the trend grades down from 7.03% in 2032 to 4.03% by 2045.

### **APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS**

Deductibles, Co-payments, and Out-of-Pocket Maximums are assumed to increase at the above trend rates. The ultimate trend rate reflects an assumed nominal per capita GDP growth.

## **APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS**

No disability was assumed for Non-Union employees.

### 5. Percent of Retirees Electing Coverage

All active union members are assumed to elect coverage at retirement. All active non-union members hired before May 1, 2009, and 50% of active non-union members hired on or after May 1, 2009, are assumed to elect coverage at retirement.

Non-union members hired on or after May 1, 2009 are assumed to decline renewal of coverage after retirement at a rate of 3% per year.

### 6. Medical and Dental Plan Elections

Below is a summary of medical plan election rates for future union retirees by Medicare status.

| Medical Plan Elections for Future Union Retirees |              |         |                   |  |  |
|--|--------------|---------|-------------------|--|--|
| Plan   | Pre-Medicare | Plan    | Medicare Eligible |  |  |
| Kaiser   | 48%          | Kaiser  | 44%               |  |  |
| Regence HSA                                      | 7%           | UHC     | 54%               |  |  |
| Regence PPO                                      | 45%          | Stipend | 2%                |  |  |

Below is a summary of medical plan election rates for future non-union retirees by Medicare status.

| Medical Plan Elections for Future Non Union Retirees |              |                   |  |  |  |

| <b>Dental Elections for Future Retirees</b> |     |     |  |  |  |
|---|-----|-----|--|--|--|
| Plan Union Non-Union                        |     |     |  |  |  |
| Moda  | 80% | 95% |  |  |  |
| Kaiser                                      | 20% | 5%  |  |  |  |

These weights were used to blend premium and claims cost for pre-Medicare medical plan, Medicare plan, and dental plan.

## 7. Spousal Coverage:

The table below shows the percentage of future retirees who are assumed to elect to cover a spouse at retirement.

| Retiree Gender | Union | Non-Union Tier 2 | Non-Union Tier 3 |
|----------------|-------|------------------|------------------|
| Male           | 65%   | 79%              | 70%              |
| Female         | 30%   | 56%              | 35%              |

## 8. Dependent Age:

For current retirees, the actual spouse date of birth was used when available.

- For future union retirees, male retirees are assumed to be three years older than their partner, and female retirees are assumed to be two years younger than their partner.
- For future non-union retirees, male retirees are assumed to be two years older than their partner, and female retirees are assumed to be two years younger than their partner.

## 9. Administrative Expenses

Administrative expenses for the Trust and operation of the OPEB plan are assumed to be \$0.

## 10. Changes Since the Last Valuation

None.

## **APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS**

### **11. New Entrant Assumptions**

The following new entrant assumptions were used for the projections shown in the Executive Summary.

- Union: The new entrant profile consists of 10 equally weighted individuals based on actual recent new entrants. The individuals range in age from 27 to 49 with an average age of 36 and 70% of the individuals are male.
- Non-Union: The new entrant profile consists of 10 equally weighted individuals based on actual recent new entrants. The individuals range in age from 28 to 44 with an average age of 36 and 50% of the individuals are male.

# **APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS**

# **Claim and Expense Assumptions**

Different methods are used to develop the claims and expense assumptions for the self-insured plans and the fully insured plans.

The claim costs and trend assumptions reflect the Inflation Reduction Act of 2022 (the Act) based on an estimated industry impact. However, as the regulations and market responses evolve, the impact on future costs could vary significantly from those assumed in this valuation. Additional market responses are expected to be known by early September.

*Self-Insured Plans:* The claims costs were developed based on actual medical, prescription drug, and dental claims paid from January 1, 2022 to December 31, 2024. The claims analysis combined plans offered to Union Retirees (Regence PPO plans, Regence HSA plan, and Regence Closed Retiree plan for medical and prescription drug, and Moda dental). As well, 85% of enrollees and claims paid from the Regence / Moda Open Retiree plan were assumed to be of Union Retirees, since separate Union and Non-Union claims data was not available for these plans. An adjustment is made to the claims to account for the children of retirees and 2025 contractual administrative expenses are added. The resulting per person per month (PPPM) cost is then adjusted using age curves.

*Fully Insured Plans:* The claims costs are based on the fully insured Kaiser premiums charged to TriMet in 2025. For pre-Medicare retirees, this is solely based on Kaiser's medical/dental plans. An adjustment is made to the premiums to account for the children of retirees. For Medicare retirees, the premiums of Kaiser Senior Advantage and United Healthcare's plan were blended based on enrollment data for the 2025 calendar year for eligible members. The resulting per person per month (PPPM) costs are then adjusted using age curves.

# **APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS**

## 1. Average Annual Claims and Expense Assumptions

The following claims costs were developed based on actuarial experience paid from January 1, 2022 to December 31, 2024 for the self-insured plans and based on the premiums in effect on December 31, 2024 for the fully-insured plans.

# **APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS**

Health plan administrative expenses are included in the average monthly premiums. For Union Regence plans, we assumed \$25.31 per member per month, for Non-Union Regence plans, we assumed \$22.04 per member per month and for Moda dental plans, we assumed \$3.21 per member per month.

Cheiron uses a claim curve model to develop age and gender specific costs for the benefits offered. The claim curve factors were developed from an analysis of publicly available industry data and actual de-identified claims experience from Cheiron's health database. This information varied between Medicare-eligible and non-Medicare eligible members to reflect the impact of Medicare coverage. The resulting data was smoothed using polynomial functions and the resulting factors were compared to actual results to confirm the reasonableness of the claim cost curves. We have not identified any material inconsistencies in assumptions or output of the Model that would affect this report.

## 2. Average Annual Premium Assumptions

The following table shows the blended premium for pre-Medicare medical, Medicare, and dental plans. We used the composite premium (per-employee-per-month) for each plan and weighted based on TriMet retirees' enrollment.

| Union<br>Plans | Employee/<br>Retiree | Spouse      | Weights Used for Blending                            |
|----------------|----------------------|-------------|--|
| Medical        | \$ 1,255.52          | \$ 1,255.52 | PPO 90 / PPO 80 / HSA / Kaiser: 15% / 30% / 7% / 48% |
| Dental         | \$ 69.67             | \$ 69.67    | 80% / 20% for all                                    |
| Medicare       | \$ 337.97            | \$ 337.97   | Kaiser / UHC / Stipend: 44% / 54% / 2%               |

| Employee/<br>Retiree  | Spouse   | Weights Used for Blending  |
|-----------------------|--|--|
|                       |  | PPO 80 / HSA / Kaiser: 70% / 0% / 30%  |
| \$ 83.25<br>\$ 289.53 | \$ 83.25<br>\$ 289.53                          | 95% / 5% for all<br>Kaiser / UHC: 30% / 70%  |
|                       | Retiree           \$ 1,071.05         \$ 83.25 | Retiree         Spouse           \$ 1,071.05         \$ 1,071.05           \$ 83.25         \$ 83.25 |

# 3. Medicare Part D Subsidy

Per GASB guidance, the Part D Subsidy has not been reflected in this valuation.

# 4. Medicare Stipend

| Tier                    | Stipend   |
|-------------------------|-----------|
| Tier 3 Retiree          | \$ 827.20 |
| Tier 2 Retiree          | \$ 589.44 |
| Tier 2 Surviving Spouse | \$ 580.61 |

# **APPENDIX B – ACTUARIAL ASSUMPTIONS AND METHODS**

## 5. Medicare Part B

All Union Medicare eligible retirees in Tier 1 and 2 are assumed to participate in Medicare Part B and receive monthly premium reimbursement.

## 6. Medicare Eligibility

All retirees who turn age 65 are assumed to be eligible for Medicare.

## 7. Geography

Implicitly assumed to remain the same as current retirees.

## 8. Changes Since the Last Valuation

There was no change to the claims costs process. The claim costs were updated to reflect experience over the past two years. Health plan administrative expenses were updated to reflect the current market experience. The blended percentages for the average annual premiums for the pre-Medicare Union plan were updated based on current enrollment.

# **Contribution Allocation Procedure**

Contributions to the Plan are made on a pay-as-you-go basis.

Pursuant to GASB 75, the Entry Age Actuarial Cost Method is used, and assumption changes and experience gains and losses are recognized over the average future working life of Plan participants. As of this valuation, the average future working life is seven years.

# **APPENDIX C – SUMMARY OF PLAN PROVISIONS**

# **Summary of Key Substantive Plan Provisions – Union Members**

**Eligibility:** Retirees who were employees immediately prior to retirement after attaining age 55 and 10 years of continuous service or who became disabled after 10 years of continuous service are eligible for the benefit.

## **Healthcare Benefit:**

## Tier 1 – Retirees who retired prior to February 1, 1992

Medical, prescription drug, and dental benefits are provided to all covered retirees, spouses, and domestic partners. Dependents receive all benefits except for dental. Retirees also are reimbursed for Medicare Part B premiums.

Benefits are payable over the life of the retiree and spouse or domestic partner while both are alive. Following the retiree's death, benefits continue to the surviving spouse or domestic partner until the earlier of the survivor's death or 16 years after the retiree's death.

Retirees and their dependents under age 65 may continue to receive the same healthcare coverage received prior to retirement, subject to plan changes made by insurers from time to time.

## Tier 2 – Retirees who retire on or after February 1, 1992 and were hired on or before October 24, 2014

Medical, prescription drug, and dental benefits are provided to all covered retirees, spouses, and domestic partners until the age of 65. Dependents receive all benefits except for dental.

Benefits are payable over the life of the retiree and spouse or domestic partner while both are alive. Following the retiree's death, benefits continue to the surviving spouse or domestic partner until the earlier of the survivor's death or 16 years after the retiree's death.

Upon attaining Medicare eligibility, retirees and dependents may enroll in a Medicare Advantage plan and dental plan or elect to receive a monthly stipend. But he/she must maintain Medicare Parts A & B. Once the stipend option is selected, the retiree may not opt back to the Medicare Advantage plan and dental plan option. Retirees who maintain Medicare Part B are reimbursed for the premiums.

## **APPENDIX C – SUMMARY OF PLAN PROVISIONS**

Retirees and their dependents under age 65 may continue to receive the same healthcare coverage received prior to retirement. Retirees under age 65 and are non-Medicare eligible, and who do not elect a stipend, will pay a monthly contribution according to the schedule shown in the previous section.

## Tier 3 – Retirees hired on or after October 25, 2014

A monthly stipend is provided to retirees until the age of 65. Retiree health benefits cease when the employee turns 65. There are no benefits for the spouse, domestic partner, or dependents.

## **Retiree Contributions**

Tier 1 retirees do not contribute to coverage. Tier 2 retirees who are not Medicare eligible and do not elect the stipend option to contribute according to the following schedule:

| Union Plans                  | Premium Contribution  |
|------------------------------|---|
| Regence 90/10                | Retirees pay the difference between Regence 90/10 premium and TriMet's employer contribution for the Regence PPO 80/20                                |
| Regence 80/20                | Retirees pay 5% of the premium cost   |
| Regence HSA                  | Retirees receive HSA deposit from TriMet equal to the difference between the HSA premium and TriMet's employer contribution for the Regence PPO 80/20 |
| All other Medical and Dental | Retirees pay 5% of the premium cost   |

## Life Insurance Benefits:

Eligible retirees in all tiers are provided a \$10,000 whole life insurance fully paid by TriMet.

# **APPENDIX C – SUMMARY OF PLAN PROVISIONS**

## **Summary of 2025 Benefit Plans**

# **APPENDIX C – SUMMARY OF PLAN PROVISIONS**

# Summary of Key Substantive Plan Provisions – Non-Union Members

**Eligibility:** Retirees who were employees immediately prior to retirement are eligible for OPEB benefit if the following requirements are met:

Tier 1 (hired prior to April 27, 2003): Age 55 and 5 years of credited service as a Non-Union employee. Tier 2 (hired on or after April 2017, 2003 and before May 1, 2009): Age 55 and 10 years of credited service as a Non-Union employee. Tier 3 (hired on or after May 1, 2009): Age 62 and 3 years of credited service as a Non-Union employee.

## Healthcare Benefit:

Medical, prescription drug, dental, and vision benefits are provided to all covered retirees, spouses, and domestic partners. Dependents receive all benefits.

Benefits are payable over the life of the retiree and spouse or domestic partner while both are alive. Following the retiree's death, benefits continue to the surviving spouse or domestic partner, and qualified dependent(s) until the earlier of the survivor's death or 10 years after the retiree's death.

Retirees and their dependents under age 65 and non-Medicare eligible may continue to receive the same healthcare coverage received prior to retirement. Upon Medicare eligibility, retirees must enroll in a Medicare Advantage plan.

Retiree health benefits cease for Tier 3 retirees when the employee becomes Medicare eligible.

## **<u>Retiree Contributions</u>**

Retirees pay a portion of the health care premium according to the following schedule:

| Non-Union Tiers                                  | Premium<br>Contribution |
|--|-------------------------|
| Grandfathered (retired prior to January 1, 1988) | 0%                      |
| Tier 1 and Tier 2 (hired before May 1, 2009)     |                         |
| Full Time  | 6%                      |
| Part Time (over 30 hours / week)                 | 6%                      |
| Part Time (less than 30 hours / week)            | 25%                     |
| Tier 3   | 100%                    |

## **APPENDIX C – SUMMARY OF PLAN PROVISIONS**

## Life Insurance Benefits:

Grandfathered retirees and eligible retirees in Tiers 1 and 2 are provided a \$10,000 whole life insurance fully paid by TriMet.

<sup>1</sup> Copay waived if admitted

## **APPENDIX D – GLOSSARY OF TERMS**

## 1. Actuarially Determined Contribution

A target or recommended contribution for the reporting period, determined in conformity with Actuarial Standards of Practice based on the most recent measurement available when the contribution for the reporting period was adopted.

## 2. Actuarial Valuation Date

The date as of which an actuarial valuation is performed. This date may be up to 24 months prior to the measurement date and up to 30 months prior to the employer's reporting date.

## 3. Deferred Inflow of Resources

An acquisition of net assets by a government employer that is applicable to a future reporting period. In the context of GASB 75, these are experience gains on the Total OPEB Liability, assumption changes reducing the Total OPEB Liability, or investment gains that are recognized in future reporting periods.

## 4. Deferred Outflow of Resources

A consumption of net assets by a government employer that is applicable to a future reporting period. In the context of GASB 75, these are experience losses on the Total OPEB Liability, assumption changes increasing the Total OPEB Liability or investment losses that are recognized in future reporting periods.

## 5. Entry Age Actuarial Cost Method

The actuarial cost method required for GASB 74 and 75 calculations. Under this method, the actuarial present value of the projected benefits of each individual included in an actuarial valuation is allocated on a level basis over the earnings of the individual between entry age and assumed exit ages. The portion of this actuarial present value allocated to a valuation year is called the service cost. The portion of this actuarial present value not provided for at a valuation date by the actuarial present value of future service costs is called the Total OPEB Liability.

## 6. Measurement Date

The date as of which the Total OPEB Liability and plan fiduciary net position are measured. The Total OPEB Liability may be projected from the actuarial valuation date to the measurement date. The measurement date must be the same as the reporting date for the plan.

## **APPENDIX D – GLOSSARY OF TERMS**

## 7. Net OPEB Liability

The liability of employers and nonemployer contributing entities for employees for benefits provided through a defined benefit OPEB plan. It is calculated as the Total OPEB Liability less the plan fiduciary net position.

## 8. Plan Fiduciary Net Position

The fair or Market Value of Assets.

## 9. Reporting Date

The last day of the plan or employer's fiscal year.

## **10. Service Cost**

The portion of the actuarial present value of projected benefit payments that is attributed to the current period of employee service in conformity with the requirements of GASB 74 and 75. The service cost is the normal cost calculated under the Entry Age Actuarial Cost Method.

## **11. Total OPEB Liability**

The portion of the actuarial present value of projected benefit payments that is attributed to past periods of employee service in conformity with the requirements of GASB 74 and 75. The Total OPEB Liability is the Actuarial Liability calculated under the Entry Age Actuarial Cost Method.
